

## Frameless (or European) Bath Enclosures

Frameless or European Bath Enclosures add a touch of European flair in a frameless design - for those who insist on the finest in luxury. Let B&G design a masterpiece for you that is refreshing to both the eye & body – sure to meet the requirements of the most sophisticated homeowner.

*HINGE & CLIPS:* Solid, Polished Brass. Also available in Polished Gold or Silver as well as the new satin finishes. Call us for available samples.

*GLASS:* 3/8" tempered glass (hinged doors) – with special notches for hinges and clips and high quality polished edges. Standard glass is clear, gray or bronze. Sliding doors are 3/8" tempered glass.

*OPENING:* Hinged door or sliding door depending on specific location and customer preference.

*OPTIONS AVAILABLE:* Handles & Towel Bars - several types available, see catalog in showroom or contact us for details

Etched Glass – for a more unique customized appearance (i.e. Monograms, murals, etc.)  
Frameless Enclosures can be used with tile, granite, or solid surface (Corian® and cultured marble) & are suitable for the following applications:

- Free standing enclosures · Neo-angle – corner units
- Tub enclosure · Customized Bath Enclosure.

*INSTALLATION:* ALL UNITS ARE CUSTOM MADE. Our technicians will measure the room to obtain precise measurements to assure the enclosure fits and functions properly. The frameless units require very close tolerances and careful installation. Final measurements are made after the walls are installed. Frameless enclosures are only sold installed.

*UNIQUE FEATURES OF FRAMELESS ENCLOSURES:* No gaskets! Vinyl gaskets detract from the style & beauty of the glass. In addition, vinyl gaskets are a maintenance item prone to prompt discoloring – taking away from the simple, clean appearance of an all glass enclosure. Since no gasket is utilized, minor leakage at the joints may result. The water spray should be directed away from the edges and leakage towel dried.

*DELIVERY:* Approx. 4 to 6 weeks after receipt of deposit, all measurements & design specifics.

*PRICING:* Due to the variables involved in a custom enclosure - it is impossible to give an exact estimate until field measurements are completed.
